PROFESSIONAL SUMMARY

Results driven Frontend Developer and UI/UX Designer with a Diploma in ICT: Multimedia Applications (CPUT) and current experience in operational management within a fast paced hospitality environment. Strong foundation in building accessible, responsive web applications using Figma, HTML5, CSS3, SASS, JavaScript, and React. Proven ability to manage live projects, meet deadlines, and collaborate with cross-functional teams, skills strengthened through hands-on leadership as a restaurant manager. Experienced in delivering real world digital solutions, including accessibility focused redesigns for national organisations. Passionate about user-centred development that combines clean, scalable code with intuitive, high impact design.

EXPERIENCE & PROJECTS

Restaurant Manager — Operations & Team Leadership

Ocean Basket Emmarentia

Dec 2025 – Present
Johannesburg, Gauteng

- Oversee daily restaurant operations, ensuring high standards of food quality, customer service, and brand consistency.
- Manage and lead front-of-house and back-of-house teams, including staff scheduling, training, performance monitoring, and conflict resolution.
- Handle cash-ups, stock control, supplier coordination, and cost management to maintain profitability and reduce waste.
- Ensure compliance with health, safety, and hygiene regulations, maintaining a clean, efficient, and customer-friendly environment.
- Resolve customer queries and complaints professionally, fostering strong customer relationships and repeat business.
- Support senior management with reporting, operational improvements, and implementation of company procedures and promotions.

UI/UX Designer — Web Design & Development

Learning 4 Life

Feb 2025 – Dec 2025
Cape Town, Western Cape

- Designed and developed user-centred interfaces in Figma, adhering to modern UI/UX standards and WCAG accessibility guidelines.
- Built responsive layouts and interactive components using HTML and CSS, improving usability across desktop and mobile devices.
- Created wireframes, prototypes, and user flows that streamlined platform usability and established visual design consistency.

- Collaborated in a cross-functional team to conceptualise and deliver digital learning tools, directly enhancing the end-user experience.
- Continuing engagement with Learning 4 Life to expand and improve their digital presence.

UI/UX Designer — Website Redesign (Accessibility Focus)

2025
Remote

Disabled People of South Africa (DPSA)

- Led UX design for a fully accessible website overhaul, prioritising inclusive design for users with visual, cognitive, and mobility impairments.
- Designed accessible navigation, readable layouts, and assistive-technology-ready prototypes in Figma.
- Applied UX research and iterative user feedback to drive usability improvements at every design stage.
- Worked closely with developers to ensure full WCAG compliance and cross-device compatibility.
- Contributed to DPSA's mission by creating a digital platform that meaningfully serves South Africa's disability community.

Multimedia Team Leader — Marketing & Content Creation

2025
Cape Town, Western Cape

Pick n Pay × CPUT Academic Project

- Led a multidisciplinary student team to design and build a responsive promotional website aligned with Pick n Pay's brand identity.
- Drove frontend development — page layouts, styling, and interactivity using HTML, CSS, and JavaScript.
- Translated design concepts into a functional, pixel-accurate web interface with strong focus on usability and layout structure.
- Coordinated planning, feedback sessions, and iterative improvements, resulting in a 3rd-place finish in a competitive academic evaluation.
